

Diesel Engine Tests

In October, Philtec supplied sensors for diesel engine vibration tests. The vibrating parts were small & therefore non-contact sensors were required.

The Sale

The customer purchased two dual channel sensors, model 2DMS-RC100-BT2/BT6, with threaded and 90° tips shown in the photos here.

Hubble Replacement Telescope

Rutherton Appleton Laboratory in the United Kingdom needed to measure displacements of critical telescope components as they were brought down to the cold temperatures of outer space.

The Sale

The customer purchased one BvF Multi-Channel Vacuum Passthru and 6 DMS sensors:

DMS-RC100 ... 2 units

DMS-RC171 ... 1 unit

DMS-D170 ... 3 units
