

4 Channel DMS

In November Philtec supplied a 4-channel DMS system for the measurement of the position of glass during the manufacture of Flat Panel Displays. FPD's include liquid crystal displays (LCDs), plasma display panels (PDPs) and organic light emitting diodes (OLEDs).

The Sale

The customer purchased a 4-channel system, model 4DMS-RC171-E with 2.5 m long fiberoptic sensor cables.

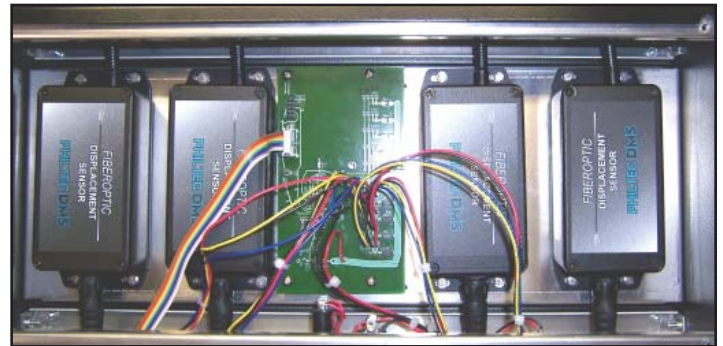

model 4DMS-RC171-E

Modular Construction

The system is modularly constructed using four mini-DMS sensors and is packaged in a 2U x 19" x 8" rack (424 mm x 200 mm x 89 mm).

We Customize Sensor Tips

A customer required a special right angle probe with the odd shape shown here in order to gain access to his measurement location while avoiding interference with a laser cutter.
