

## DMS SETUP & CONTROL SOFTWARE

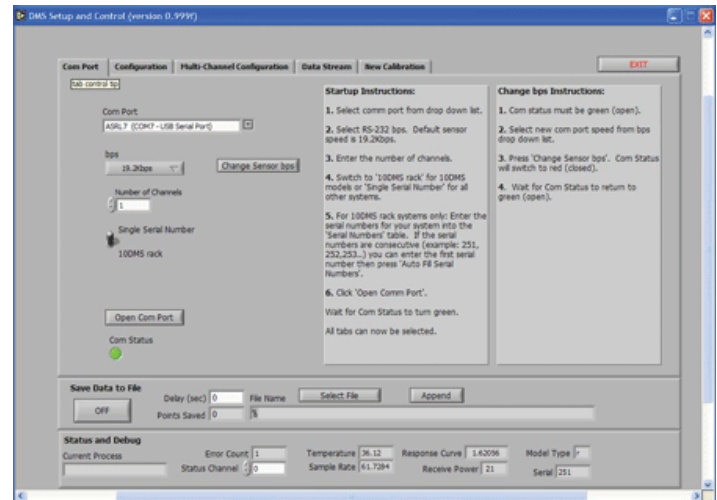

••• Video Tutorial Now Available •••

Our DMS control software continues to evolve. The most current version as of this date is 0.999f.

This version works with any single or dual channel or 10DMS rack.

A video tutorial has been made to help the user get up to speed using the software. A link to this movie can be found at [www.Philtec.com/firmware.htm](http://www.Philtec.com/firmware.htm)

- Right click your mouse on the Tutorial Link,
- Save the file to your PC
- Play the video using Windows Media Player.

## TOOL FOR SALES AGENTS

The DMS control software is a wonderful tool for sales agents. With this software in hand, all you need to make a customer demo is:

1. a Laptop PC
2. a DMS sensor
3. a target - almost anything can be used

For those offices that have existing DMS demo sensors, **please update your firmware so that you can use this current software.** The process is simple. Connect your sensor to a PC that is internet ready.

At the above firmware address:

- install the DMS Firmware Update 2.615
- download the Operating Software 0.999f

## MINI-DMS DEMO SENSORS

Every sales office should have one DMS sensor with the current software. A mini-DMS sensor makes an excellent demonstration sensor. We will provide you a mDMS for \$500. Please make your request. You will not be disappointed.
