

2006 - It Was A Very Good Year

RECORD SALES

Business was steady all year and closed strong. New Purchase Orders received set an all time record in 2006. Here's a look at some of the more successful applications of the year.

Glass Shape Measurement

100 Philtec delivered ten 10DMS racks each equipped with 10 model RC171 sensors. These will be used to check the shape of auto glass windows in production.

Viscous Drag Measurement

40 Philtec delivered 40 model D63 sensors for incorporation into viscometer equipment for the Petrochemical Industry. The sensors measure small angular fluctuations of a shaft when lubricants are sheared under heat and pressure.

Silicon Wafer Trimming

50 Philtec delivered 50 model RC20 sensors with custom 90° tips. These sensors are incorporated into machinery that perform process line trimming of wafers during the manufacture of integrated circuits.

Disk Drive Height Measurement

30 Philtec delivered 30 model RC60 sensors with short tips for assembly of small disc drives. The sensors measure the height of the disk pack at installation. Option V10 provides a 10 volt output amplifier.
