

Now Available: mini-DMS with USB Output

We have completed development of the mini-DMS sensor with USB output. USB sensors are now available in single channel or 10DMS versions. These are designated as the muDMS series and will have the following features:

- 5 KHz minimum data rate for single sensors
- 5 KHz minimum data rate per channel for multi-channel modes
- Operated With Philtec's Standard DMS Control Software

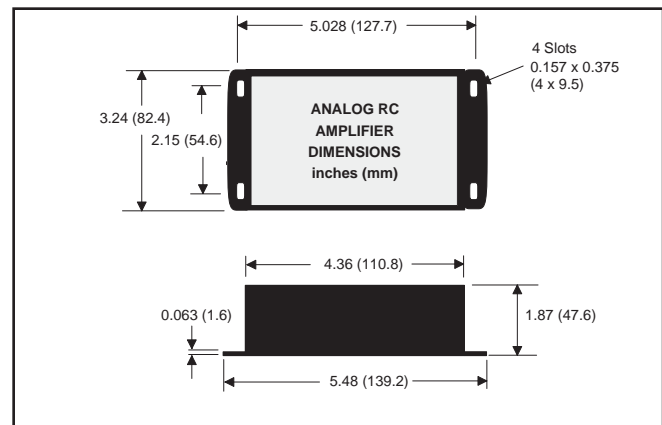

Packaging

Single sensors are provided with a locking style mini-USB connector, a 2 m long mini-USB to standard USB adapter cable, and an AC/DC power adapter.

10DMS racks are equipped with standard USB as well as RS232 connectors.

Single Channel Enclosure

Single sensors are provided in the same size enclosure as used for our standard RC sensors.

Pricing

The muDMS are priced higher than the mDMS. New price lists and datasheets dated Jan 2009 are being prepared for distribution. Until those are published, please RFQ the factory for pricing.
